

# **Quiz 1**

**STAT 109: Introductory Biostatistics**

# Quiz 1

This quiz will be held in the first 10 minutes of lab on Thursday. It will contain two questions:

- What is the definition of Statistics?
- What are the five steps in the Statistical Process?

Normally I'll provide both practice problems and their answers to help prepare for our weekly quizzes. But because this quiz is our first one and you won't have had enough time to properly prepare, it will be graded based on participation, not correctness.
